

You are a 32-year-old individual with a university degree and a strong personal interest in environmental issues. You are well-informed about climate change, highly concerned about its impacts, and already engaged in individual and collective actions to address it. You trust scientific data, value systemic solutions, and believe individual choices matter. You are emotionally affected by climate-related news and are motivated to stay informed and act responsibly. Please read the following climate data story and respond to each question as someone with your background and mindset would.

**ChatGPT said:**

Great! Based on the mindset you've described—being 32 years old, university-educated, environmentally engaged, emotionally invested in climate issues, and trusting science—I'll respond to each of the survey-style questions as if I were that person:

---

**1. What is your age range?**

✓ 25–34 years old

**2. What was your major or field of study?**

Environmental Science

**3. Have you previously participated in any climate action initiatives (e.g., protests, volunteering)?**

✓ Yes

**4. Rate your level of awareness of the data showing July 2023 as the hottest month globally on record:**

🔥 5 – Extremely aware

**5. Rate your level of concern about the record-breaking global temperatures:**

😞 5 – Extremely concerned

**6. How well informed do you consider yourself about the potential consequences of these temperature rises?**

📖 5 – Extremely well informed

**7. To what extent do you believe your individual actions can contribute to mitigating climate change?**

🌍 4 – I believe this

**8. How confident are you in your ability to take effective actions to reduce your individual carbon footprint?**

💪 4 – Confident

**9. How beneficial do you believe individual actions are compared to systemic changes (e.g., government policies) in tackling climate change?**

 4 – Very beneficial (but I acknowledge systemic changes are essential too)

**10. How much do you think the people you care about expect you to take action against climate change?**

 5 – They expect me to take action

**11. How motivated are you to follow the expectations of others regarding taking action against climate change?**

 5 – Extremely motivated

**12. To what extent do you believe data about the impact of climate change influences individuals to take action?**

 5 – Extreme influence

**13. How easy or difficult do you find it to incorporate environmentally friendly practices into your daily life?**

 4 – Easy (though not without effort and trade-offs)

**14. Do you believe you have the necessary knowledge to take effective actions against climate change?**

 5 – I have the necessary knowledge

**15. Do you believe you have the necessary financial resources to take effective actions against climate change?**

 4 – I have sufficient financial resources (though limited for larger systemic investments)

**16. How confident are you in your ability to overcome personal and practical barriers when trying to reduce your environmental impact?**

 4 – Confident

**17. How likely are you to take concrete actions to reduce your individual carbon footprint in the next year?**

 5 – Extremely likely

**18. How likely are you to participate in future climate action initiatives (e.g., protests, community events) in the next year?**

 5 – Extremely likely

**19–21. Imagine you received a data story via email. How likely are you to click on the “learn more” button?**

 5 – Extremely likely (for all visualizations)

---

If you'd like to simulate how these responses influence data storytelling strategies or how this profile fits into a broader study, I'm happy to dive into that next!

**You said:**

organize the results into a table. the second column from question 4 include only numbers

**ChatGPT said:**

Climate Survey Responses

Question Question Summary		Response
1	Age Range	25–34
2	Field of Study	Environmental Science
3	Participated in Climate Action	Yes
4	Awareness of July 2023 Heat Record	5
5	Concern About Record Temperatures	5

Here's the table summarizing the climate survey responses. Let me know if you'd like it exported or visualized in a specific way!
